

May 5th, 2018

Dear Kevin and members of Water Wells First,

When I travelled through Chatham-Kent and meet your group and saw first hand the food cooked in well water with sediments containing Black Shale I was appalled at how this could happen in my Province.

The Liberal government has not only let your rural community down but has shown what lies ahead for every Ontarian, rural or urban, that if the Wynne government gets re-elected they won't take water safety seriously. Their track record proves this.

You asked me if I would look into this.

I now have.

You asked me if I would commit in writing to you to a health hazard investigation into the sediments polluting the water wells in Dover and Chatham townships.

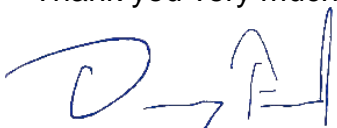

I will. I Doug Ford and the PC Party of Ontario is committed to seeing clean safe water is available to every Ontarian.

I commit myself and the PC Party of Ontario to stopping this travesty and commit that a full health hazard investigation is conducted in North Chatham-Kent so that the full extent of the health risks and the number of families affected is known.

As Premier, you have my word Kevin we will hold accountable every party that did this.

The PC Party of Ontario protects the Water Security of Ontarians.

Thank you very much,

Doug Ford
